## Customer Support Overview

If you experience difficulties after reading the manual and/or using the product, contact the Connect Tech reseller from which you purchased the product. In most cases the reseller can help you with product installation and difficulties.

In the event that the reseller is unable to resolve your problem, our highly qualified support staff can assist you. Our support section is available 24 hours a day, 7 days a week on our website at: [www.connecttech.com/sub/support/support.asp](http://www.connecttech.com/sub/support/support.asp). See the contact information section below for more information on how to contact us directly. Our technical support is always free.

## Contact Information

We offer three ways for you to contact us:

### Mail/Courier

You may contact us by letter at:  
Connect Tech Inc.  
Technical Support  
42 Arrow Road  
Guelph, Ontario  
Canada N1K 1S6

### Email/Internet

You may contact us through the Internet. Our email and URL addresses on the Internet are:

[sales@connecttech.com](mailto:sales@connecttech.com)  
[support@connecttech.com](mailto:support@connecttech.com)  
[www.connecttech.com](http://www.connecttech.com)

### Note:

Please go to the [Download Zone](#) or the [Knowledge Database](#) in the [Support Center](#) on the Connect Tech website for product manuals, installation guides, device driver software and technical tips. Submit your technical support questions to our customer support engineers via the [Support Center](#) on the Connect Tech website.

### Telephone/Facsimile

Technical Support representatives are ready to answer your call Monday through Friday, from 8:30 a.m. to 5:00 p.m. Eastern Standard Time. Our numbers for calls are:

**Toll Free:** 800-426-8979 (North America only)

**Telephone:** 519-836-1291 (Live assistance available 8:30 a.m. to 5:00 p.m. EST,  
Monday to Friday)

**Facsimile:** 519-836-4878 (on-line 24 hours)

## **Limited Lifetime Warranty**

Connect Tech Inc. provides a Lifetime Warranty for all Connect Tech Inc. products. Should this product, in Connect Tech Inc.'s opinion, fail to be in good working order during the warranty period, Connect Tech Inc. will, at its option, repair or replace this product at no charge, provided that the product has not been subjected to abuse, misuse, accident, disaster or non-Connect Tech Inc. authorized modification or repair.

You may obtain warranty service by delivering this product to an authorized Connect Tech Inc. business partner or to Connect Tech Inc. along with proof of purchase. Product returned to Connect Tech Inc. must be pre-authorized by Connect Tech Inc. with an RMA (Return Material Authorization) number marked on the outside of the package and sent prepaid, insured and packaged for safe shipment. Connect Tech Inc. will return this product by prepaid ground shipment service.

The Connect Tech Inc. Lifetime Warranty is defined as the serviceable life of the product. This is defined as the period during which all components are available. Should the product prove to be irreparable, Connect Tech Inc. reserves the right to substitute an equivalent product if available or to retract Lifetime Warranty if no replacement is available.

The above warranty is the only warranty authorized by Connect Tech Inc. Under no circumstances will Connect Tech Inc. be liable in any way for any damages, including any lost profits, lost savings or other incidental or consequential damages arising out of the use of, or inability to use, such product.

## **Copyright Notice**

The information contained in this document is subject to change without notice. Connect Tech Inc. shall not be liable for errors contained herein or for incidental consequential damages in connection with the furnishing, performance, or use of this material. This document contains proprietary information that is protected by copyright. All rights are reserved. No part of this document may be photocopied, reproduced, or translated to another language without the prior written consent of Connect Tech, Inc.

## Introduction

Connect Tech's Xtreme/SBC is a small embedded carrier board that utilizes the PCI/104-Express form factor, which has the standard PC/104 dimensions with 4 x1 PCIe lanes. This carrier board includes the required connectors and cables for easy connection to 2x SATA, 2x RS-232, 2x RS-422/485, 4x USB 2.0, 1x Gigabit Ethernet, LVDS and VGA Video.

The PCIe/104 Single Board Computer allows complete integration with any industry standard Qseven module, transforming it into a robust Single Board Computer (SBC) in the PC/104 form factor. Xtreme/SBC is ideal for a broad range of embedded applications. The Qseven standard allows upgrading to the latest processor and memory technology with ease, while maintaining the I/O interfaces.

## Features

- Qseven module carrier
- PCIe-104 form factor
- Four x1 PCIe Lanes
- Dual display, VGA (via SDVO) and 1x24 LVDS
- 2x SATA
- 2x RS232
- 2x RS485
- 1x 10/100/1000 Ethernet
- ATX power input or +5V/+12V only operation

## What is Qseven?

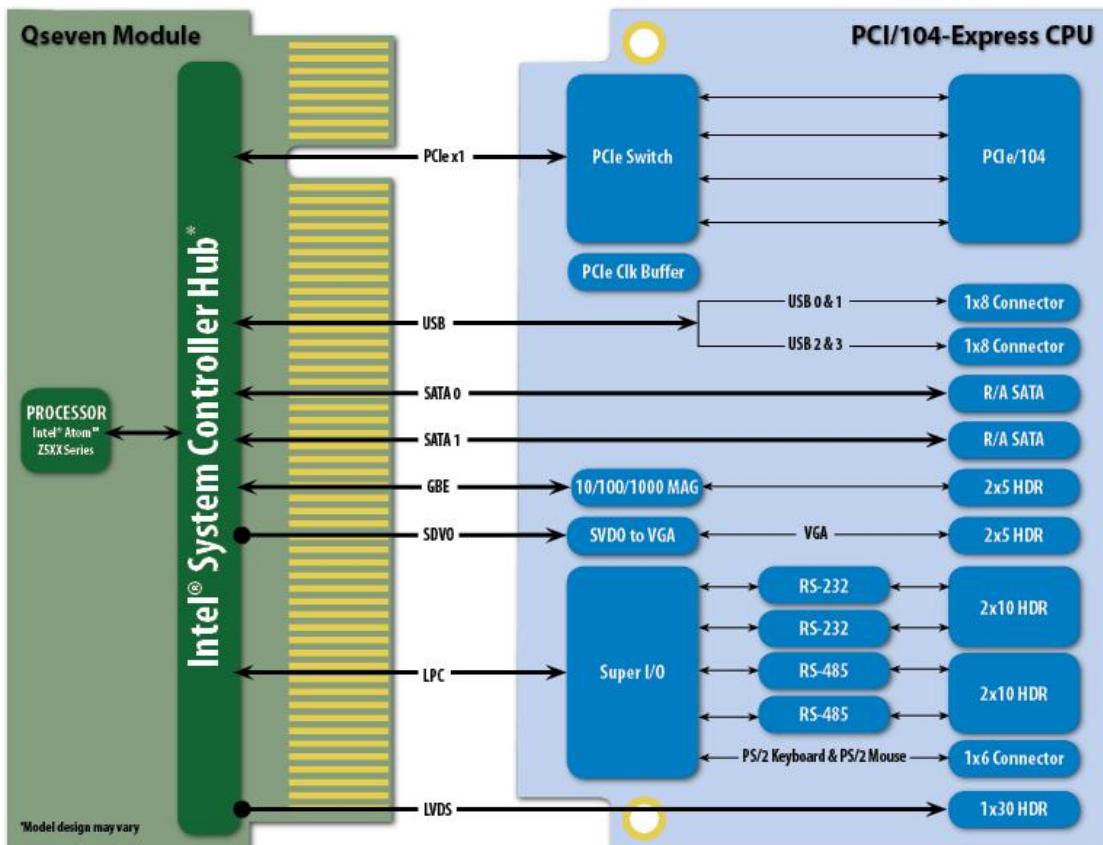

Qseven is a standard that enables integration of Computer-on-Modules with mobile and embedded applications. To learn more about Connect Tech's PCIe/104 Single Board Computer, visit <http://www.connecttech.com/sbc>.

## System Block Diagram

The Qseven module implements the core processing features including: processor, memory, and system physical interfaces via the southbridge.

Many of the Qseven modules are based on the mobile Intel Atom architecture (Z series processor + Poulsbo / SCH US15W chipset); shown in the block diagram below.

This document will generally refer to the features of the US15W.

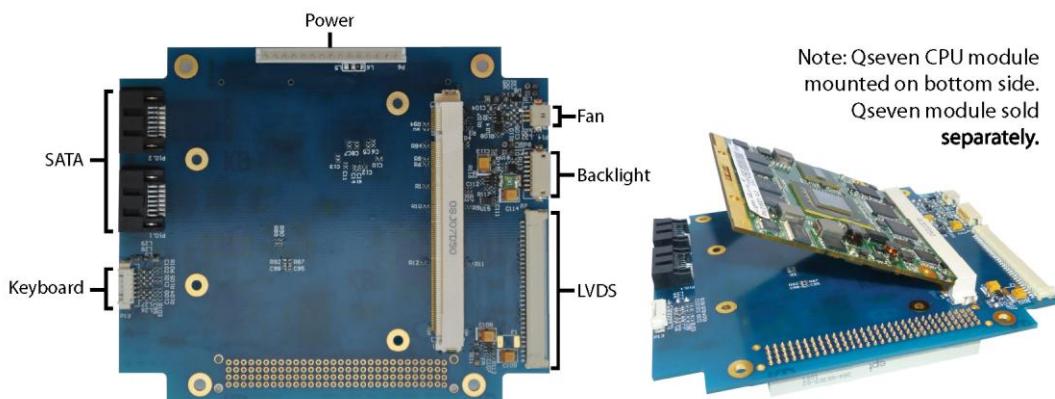

## Hardware Description

### Connector Locations

PCI/104-Express Single Board Computer – Top

PCI/104-Express Single Board Computer – Bottom

Connector Summary

Location	Connection
P1	Q7
P2	PCIe-104
P3A, P3B	USB
P4	GBE
P5	VGA
P6	ATX Power
P7	LVDS Video
P8	LVDS Backlight
P9	RS232 serial
P10A, P10B	SATA
P11	RS485 serial
P12	PCI-104
P13	PS/2 Keyboard & Mouse
P14	Fan Power
P16	Battery holder

Jumper Summary

Jumper	Function
J1	PS/2 power
J2	Fan Power
J3	Fan PWM polarity
J4	LVDS panel power
J5	LVDS backlight enable polarity
J6	LVDS Backlight Power
J7	Suspend Selection
J8	Power Supply On
J9	Power Button

## Qseven Module Interface

### Description

The processor and Chipset are implemented on the Qseven CPU module, which connects to the Xtreme/SBC via a MXM connector. As previously mentioned, many of the existing Qseven Modules use the Intel Atom mobile architecture, Z series processor + Poulsbo / SCH US15W chipset. The Xtreme/SBC implements a subset of the Qseven features, as described in the introduction.

For a list of Qseven module vendors, visit <http://www.qseven-standard.org/>

### Connector

Function	Qseven interface
Location	P1
Type	MXM Foxconn AS0B326-S78N-7F (or equivalent)
Pinout	Refer to Qseven specification

## Graphics

The availability of the graphics interfaces depends on the Qseven module selected.

*US15W:* The US15W chipset provides GMA 500 graphics sub-system and provides two display interfaces: SDVO (serial digital video output) and LVDS (low voltage differential signalling). The resolution is generated by the GMA 500 is limited 1280x1024.

The configuration of either interface as the primary or secondary display depends on the Qseven module's BIOS capabilities and settings. Refer to the Qseven module's documentation for more details.

## VGA

### Description

The VGA interface is implemented using the Qseven SDVO interface, with a SDVO to VGA converter (Chrontel CH7317B) which supports resolutions up to 1920x1200; however actual resolutions depend on the Qseven module.

### Connector

Function	VGA graphics			
Location	P5			
Type	2x5 2mm header MLE TSHSM-205-D-06-G-V-L (or equivalent)			
Pinout	Pin	Signal	Pin	Signal
	1	DAC_RED	2	GND
	3	DAC_GREEN	4	N/C
	5	DAC_BLUE	6	SC_DDC
	7	HSYNC	8	SD_DDC
	9	VSYNC	10	GND

## LVDS

### Description

The Xtreme/SBC provides dual 18 or 24 bit LVDS display channels via P7, which are connected directly from the Qseven module. LVDS panel supply power is selected with jumper J4 and backlight power is selected with jumper J6. Both are current limited to 500 mA.

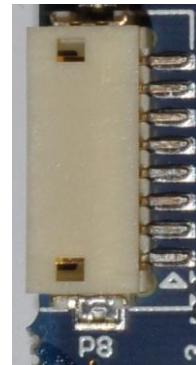

*US15W:* The US15W provides only a single 18 or 24 bit display channel. Each LVDS data pair carries two bits, each channel has four data pairs.

### Connectors & Jumpers

Function	LVDS Graphics		
Location	P7		
Type	Hirose DF14-30P-1.25H connector		
Pinout	Pin	Signal	Description
	1	VCC_PNL	Panel Power
	2	VCC_PNL	Panel Power
	3	GND	Digital ground
	4	GND	Digital ground
	5	LVDS_A3_N	Channel A Data
	6	LVDS_A3_P	Channel A Data
	7	LVDS_CLK_N	Channel A Clock
	8	LVDS_ACLK_P	Channel A Clock
	9	GND	Digital ground
	10	LVDS_A2_N	Channel A Data
	11	LVDS_A2_P	Channel A Data
	12	LVDS_A1_N	Channel A Data
	13	LVDS_A1_P	Channel A Data
	14	LVDS_A0_N	Channel A Data
	15	LVDS_A0_P	Channel A Data
	16	GND	Digital ground
	17	LVDS_B3_N	Channel B Data
	18	LVDS_B3_P	Channel B Data
	19	LVDS_BCLK_N	Channel B Clock
	20	LVDS_BCLK_P	Channel B Clock
	21	GND	Digital ground
	22	LVDS_B2_N	Channel B Data
	23	LVDS_B2_P	Channel B Data
	24	LVDS_B1_N	Channel B Data
	25	LVDS_B1_P	Channel B Data
	26	LVDS_B0_N	Channel B Data
	27	LVDS_B0_P	Channel B Data
	28	GND	Digital ground
	29	LVDS_DID_CLK	Display ID Clock (3.3V)
	30	LVDS_DID_DATA	Display ID Data (3.3V)

<b>Function</b>	<b>LVDS backlight power</b>		
<b>Location</b>	P8		
<b>Type</b>	Hirose DF13-8P-1.25H connector		
<b>Pinout</b>			
<b>Pin</b>	<b>Signal</b>	<b>Description</b>	
	1	+12V	+12 V DC, max. 1A
	2	+12V	+12 V DC, max. 1A
	3	+5V	+5 V DC, max. 1A
	4	+5V	+5 V DC, max. 1A
	5	LVDS_BLEN	Backlight enable, level selected with J4
	6	VCC_BKL	Back light power, selected with J6
	7	GND	Digital ground
	8	GND	Digital ground

<b>Function</b>	<b>LVDS backlight power select</b> Selects either +12V or +5V. Refer to the display panel's documentation for proper configuration.		
<b>Location</b>	J6		
<b>Type</b>	1x3 0.100" jumper block		
<b>Pinout</b>			
<b>Position</b>	<b>Description</b>		
	1-2	+12V	
	2-3	+5V	
	off	floating	
<b>Default</b>	+12V		

<b>Function</b>	<b>LVDS panel power select</b> Selects either +3.3V or +5V. Refer to the display documentation for proper configuration.		
<b>Location</b>	J4		
<b>Type</b>	1x3 0.100" jumper block		
<b>Pinout</b>			
<b>Position</b>	<b>Description</b>		
	1-2	+5V	
	2-3	+3.3V	
	off	floating	
<b>Default</b>	+3.3V		

\* Note the silk screen labels +5V and +3.3V are reversed on Revision A.

<b>Function</b>	<b>LVDS backlight enable polarity</b> Selects either positive or negative. Refer to the inverter power supply documentation for proper configuration.						
<b>Location</b>	J5						
<b>Type</b>	1x2 2mm jumper block						
<b>Pinout</b>	<table border="1"> <thead> <tr> <th>Position</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>off</td> <td>Positive polarity</td> </tr> <tr> <td>on</td> <td>Negative polarity</td> </tr> </tbody> </table>		Position	Description	off	Positive polarity	on
Position	Description						
off	Positive polarity						
on	Negative polarity						
<b>Default</b>	Positive polarity						

## Gigabit Ethernet

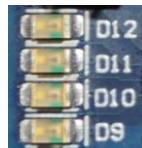

### Description

The gigabit Ethernet interface's controller (MAC + PHY) is implemented on the Qseven module, while the Xtreme/SBC provides the necessary magnetics and termination.

Most Qseven modules support 1000BASE-T, 100BASE-TX, and 10BASE-T standards with either a Realtek 8111 or Intel 82574 PCIe Ethernet controller.

### Connector & LEDs

<b>Function</b>	<b>Gigabit Ethernet</b>																																								
<b>Location</b>	P8

<b>Function</b>	<b>Ethernet Status LEDs</b>												
<b>Locations</b>	<table border="1"> <thead> <tr> <th>Pin</th> <th>Signal</th> </tr> </thead> <tbody> <tr> <td>D9</td> <td>Activity</td> </tr> <tr> <td>D10</td> <td>1000BASE-T Link</td> </tr> <tr> <td>D11</td> <td>100BASE-TX Link</td> </tr> <tr> <td>D12</td> <td>10BASE-T Link</td> </tr> </tbody> </table>			Pin	Signal	D9	Activity	D10	1000BASE-T Link	D11	100BASE-TX Link	D12	10BASE-T Link
Pin	Signal												
D9	Activity												
D10	1000BASE-T Link												
D11	100BASE-TX Link												
D12	10BASE-T Link												

## USB 2.0

### Description

The Xtreme/SBC implements 4 of the 8 available USB 2.0 connections via two connectors. Over current protection and power supply filtering is provided.

Only the USB host features of the Qseven specification have been implemented, USB client features are not supported.

### Connector

Function	USB 2.0 x2		
Locations	P3A, P3B		
Type	Hirose DF13-8P		
Pinout	Pin	Signal	Description
	1	VCC_USB_0	Port 0 Filtered +5V
	2	USB_0_N	Port 0 Data
	3	USB_0_P	Port 0 Data
	4	USB_GND_0	Port 0 Filtered Digital Ground
	5	USB_GND_1	Port 1 Filtered Digital Ground
	6	USB_1_N	Port 1 Data
	7	USB_1_N	Port 1 Data
	8	VCC_USB_1	Port 1 Filtered +5V

## SATA

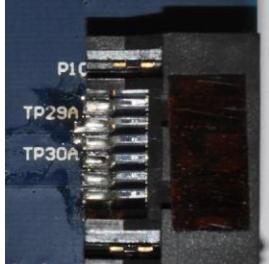

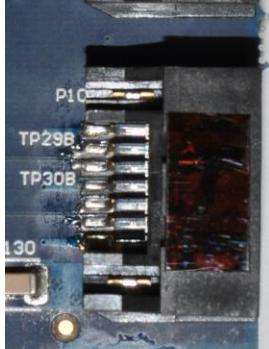

### Description

The Xtreme/SBC provides 2 SATA host connections.

*US15W:* Most Qseven modules based on the US15W, convert the US15W's IDE interface to one SATA connection (as IDE master) and one built-in NAND based flash drive (as IDE slave). Consult the Qseven module's documentation for more information.

In this case only P10A connector is active

## Connector & LEDs

## PCI/104-Express

### Description

The Xtreme/SBC provides 4 x1 PCIe lanes to the PCI/104-Express connector; allowing four PCIe-104 boards to be stacked on top. The 4 x1 PCIe lanes are implemented via an IDT 1-4 PCIe switch, consuming only one of the available PCIe lanes from the Qseven modules. Most US15W Qseven modules expose only one PCIe lane.

Note: The Xtreme/SBC provides 3.3V generated from the ATX +5V input power. It is limited to 3.5A.

### Connectors

<b>Function</b>	<b>PCIe-104 top mount</b>
<b>Locations</b>	P2
<b>Type</b>	Industry standard Samtec ASP-129637-03
<b>Pinout</b>	The following table indicates which of the PCIe-104 signals are connected

<b>Function</b>	<b>PCI-104 top mount – mechanical only, does not carry signals</b>
<b>Locations</b>	P12
<b>Type</b>	Industry standard EPT 264-60303-02
<b>Note</b>	Connector is not populated by default. Can be installed on request.

## **LPC Super I/O**

The Xtreme/SBC implements many low speed legacy I/O features with the SMSC SCH3114 Super I/O, which is connected to the Qseven module via the LPC (Low Pin Count) bus. This Super I/O device provides 4 serial ports, 2 PS/2, and many other status / control features.

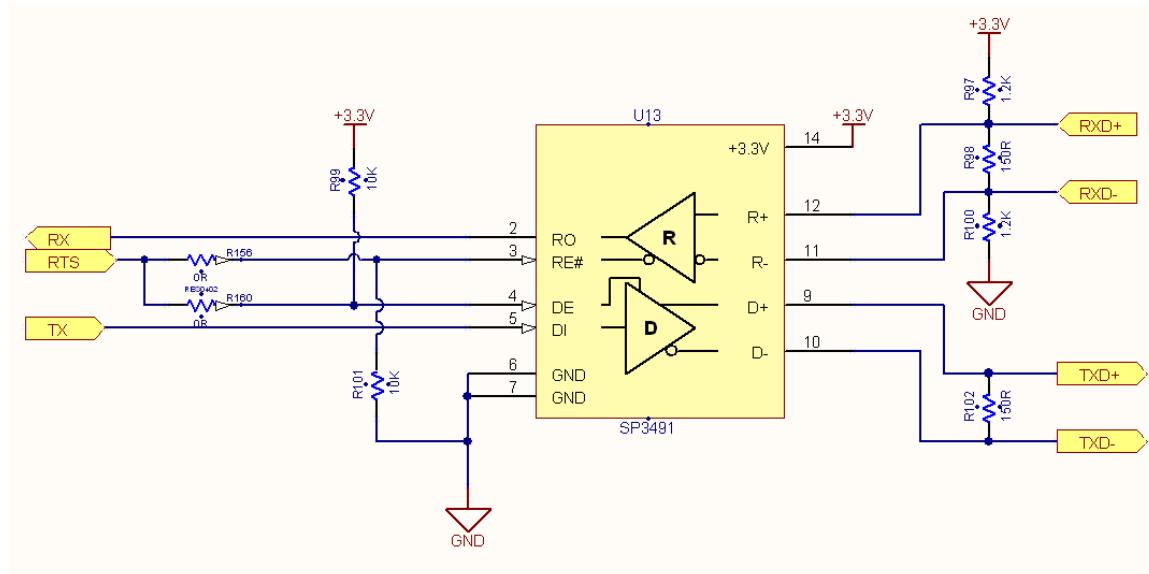

Note: the Qseven specification states that all Qseven modules BIOS implementations must support either the Winbond W83627 or SMSC SCH3114.

## Serial

### Description

Two RS232 serial ports are provided on P9 and two RS485 serial ports are provided on P11.

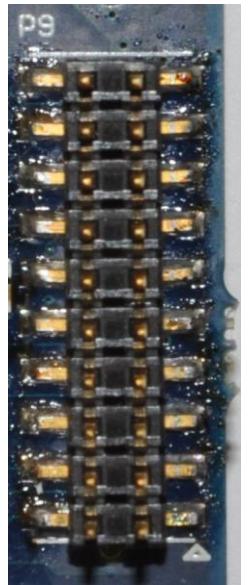

For the RS485 ports, the default configuration is full duplex without any bias or termination. Various resistors configurations can be populated to enable TX and RX termination as well as RTS control. The following diagram shows the available configuration options. Contact Connect Tech's support department for further information.

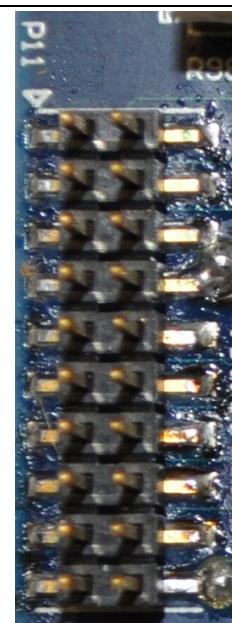

Resistor	Function	Default
R99	Always enable driver	Populated
R101	Always enable receiver	Populated
R156	RTS controlled receiver	
R160	RTS controlled driver	
R98	Receiver termination	
R102	Driver termination	
R100	Receiver bias	
R97	Receiver bias

17	TXD1-	18	N/C
19	GND	20	N/C

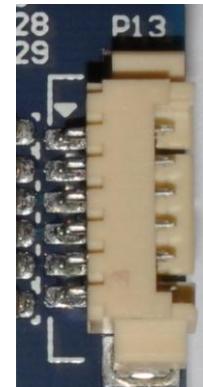

## PS/2 Keyboard and Mouse

### Description

A PS/2 keyboard and PS/2 mouse interface are provided via P13; where the PS/2 voltage is selectable with J1. Refer to the specification printed on the bottom of the keyboard and mouse to determine which voltage to select; in most cases this is 5V.

### Connectors & Jumpers

<b>Function</b>	PS/2 Keyboard and Mouse																							
<b>Locations</b>	P13																							
<b>Type</b>	Molex 0532610671 connector																							
<b>Pinout</b>	<table border="1"> <thead> <tr> <th>Pin</th> <th>Signal</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>KDAT</td> <td>Keyboard Data</td> </tr> <tr> <td>2</td> <td>KCLK</td> <td>Keyboard Clock</td> </tr> <tr> <td>3</td> <td>PS2_GND</td> <td>Filtered digital ground</td> </tr> <tr> <td>4</td> <td>PS2_VCC</td> <td>Filtered PS/2 supply voltage, via J1</td> </tr> <tr> <td>5</td> <td>MDAT</td> <td>Mouse Data</td> </tr> <tr> <td>6</td> <td>MCLK</td> <td>Mouse Clock</td> </tr> </tbody> </table>			Pin	Signal	Description	1	KDAT	Keyboard Data	2	KCLK	Keyboard Clock	3	PS2_GND	Filtered digital ground	4	PS2_VCC	Filtered PS/2 supply voltage, via J1	5	MDAT	Mouse Data	6	MCLK	Mouse Clock
Pin	Signal	Description																						
1	KDAT	Keyboard Data																						
2	KCLK	Keyboard Clock																						
3	PS2_GND	Filtered digital ground																						
4	PS2_VCC	Filtered PS/2 supply voltage, via J1																						
5	MDAT	Mouse Data																						
6	MCLK	Mouse Clock																						

<b>Function</b>	PS/2 voltage select Selects either +3.3V auxiliary or +5V auxiliary.										
<b>Location</b>	J1										
<b>Type</b>	1x3 0.1" jumper										
<b>Pinout</b>	<table border="1"> <thead> <tr> <th>Position</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>1-2</td> <td>+3.3V_A</td> </tr> <tr> <td>2-3</td> <td>+5V_A</td> </tr> <tr> <td>off</td> <td>floating</td> </tr> </tbody> </table>			Position	Description	1-2	+3.3V_A	2-3	+5V_A	off	floating
Position	Description										
1-2	+3.3V_A										
2-3	+5V_A										
off	floating										
<b>Default</b>	+3.3V										

## Power

### Description

The Xtreme/SBC is designed to be powered from an ATX type power supply, and support many of the ACPI features like suspend to RAM. A CR1225 battery holder (P16) provides the VBAT for the Qseven module.

The Xtreme/SBC generates 3.3V on board, to facilitate alternate powering options.

**WARNING:** Do not attach a PCIe-104 power supply to P2 (the PCIe104 connector). These power supplies typically generate 3.3V, which would conflict with the onboard 3.3V.

Other powering options include

A) +5V & +12V only: The ATX features can be bypassed by powering +5V\_SB with same 5 volt supply as the +5V input pins.

B) +5V only: similar to the above cause, but excluding the +12V which is used only by the backlight and PCIe-104 connector. Before attempting this, verify that this configuration is appropriate for the target installation.

### Connectors & Jumpers

<b>Function</b>	ATX input power		
<b>Location</b>	P6		
<b>Type</b>	JST B15B-EH-A		
<b>Pinout</b>	<b>Pin</b>	<b>Signal</b>	<b>Description</b>
	1	+5V	+5V input, powers onboard power regulators & Qseven module
	2	GND	Digital Ground
	3	+5V	+5V input, powers onboard power regulators & Qseven module
	4	GND	Digital Ground
	5	+5V	+5V input, powers onboard power regulators & Qseven module
	6	+5V_SB	+5V standby input, powers +3.3V auxiliary power
	7	GND	Digital Ground
	8	PSON#	Power Supply On
	9	PWROK	Power OK
	10	+3.3V	+3.3V input, not used by Xtreme/SBC. +3.3V is derived on internally
	11	GND	Digital Ground
	12	+12V	+12V input, used by PCIe104 and backlight
	13	+12V	+12V input, used by PCIe104 and backlight
	14	GND	Digital Ground
	15	-12V	-12V input, not used

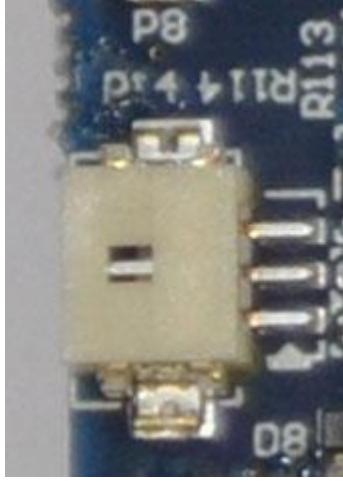

<b>Function</b>	<b>Suspend Selection</b> Selects either S3 or S5.									
<b>Location</b>	J7									
<b>Type</b>	1x3 2 mm									
<b>Pinout</b>	<table border="1"> <thead> <tr> <th>Position</th><th>Description</th></tr> </thead> <tbody> <tr> <td>1-2</td><td>Suspend S3</td></tr> <tr> <td>2-3</td><td>Suspend S5</td></tr> <tr> <td>off</td><td>Floating</td></tr> </tbody> </table>		Position	Description	1-2	Suspend S3	2-3	Suspend S5	off	Floating
Position	Description									
1-2	Suspend S3									
2-3	Suspend S5									
off	Floating									
<b>Default</b>	S3									
<b>Function</b>	<b>Power Supply on</b> Selects either PS_ON# signal from Qseven module or always on									
<b>Location</b>	J8									
<b>Type</b>	1x3 2mm									
<b>Pinout</b>	<table border="1"> <thead> <tr> <th>Position</th><th>Description</th></tr> </thead> <tbody> <tr> <td>1-2</td><td>Always on</td></tr> <tr> <td>2-3</td><td>Qseven PS_ON#</td></tr> <tr> <td>off</td><td>floating</td></tr> </tbody> </table>	Position	Description	1-2	Always on	2-3	Qseven PS_ON#	off	floating	
Position	Description									
1-2	Always on									
2-3	Qseven PS_ON#									
off	floating									
<b>Default</b>	Qseven PS_ON#									
<b>Function</b>	<b>Power Button</b> Selects either +3.3Vauxiliary or +5V auxiliary.									
<b>Location</b>	J9									
<b>Type</b>	1x2 2mm header									
<b>Pinout</b>	<table border="1"> <thead> <tr> <th>Position</th><th>Description</th></tr> </thead> <tbody> <tr> <td>1</td><td>PWR_BTN#</td></tr> <tr> <td>2</td><td>Ground</td></tr> </tbody> </table>		Position	Description	1	PWR_BTN#	2	Ground		
Position	Description									
1	PWR_BTN#									
2	Ground									

## Fan Control

### Description

If actively cooling is required; P14 can be used to power and control a fan with J2 selecting the fan voltage.

### Connectors & Jumpers

<b>Function</b>	<b>Fan power/control</b>														
<b>Location</b>	P14														
<b>Type</b>	JST B15B-EH-A connector														
<b>Pinout</b>	<table border="1"> <thead> <tr> <th>Pin</th> <th>Signal</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>FAN_SPEED</td> <td>Speed signal</td> </tr> <tr> <td>2</td> <td>FAN_PWR</td> <td>Fan power selected by J2</td> </tr> <tr> <td>3</td> <td>FAN_GND</td> <td>Filtered digital ground</td> </tr> </tbody> </table>			Pin	Signal	Description	1	FAN_SPEED	Speed signal	2	FAN_PWR	Fan power selected by J2	3	FAN_GND	Filtered digital ground
Pin	Signal	Description

2	FAN_PWR	Fan power selected by J2													
3	FAN_GND	Filtered digital ground													
															

<b>Function</b>	<b>Fan power Selection</b> Selects either +5V or +12V.										
<b>Location</b>	J2										
<b>Type</b>	1x3 0.100" jumper										
<b>Pinout</b>	<table border="1"> <thead> <tr> <th>Position</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>1-2</td> <td>+12V</td> </tr> <tr> <td>2-3</td> <td>+5V</td> </tr> <tr> <td>off</td> <td>Floating</td> </tr> </tbody> </table>			Position	Description	1-2	+12V	2-3	+5V	off	Floating
Position	Description										
1-2	+12V										
2-3	+5V										
off	Floating										
<b>Default</b>	floating										
											

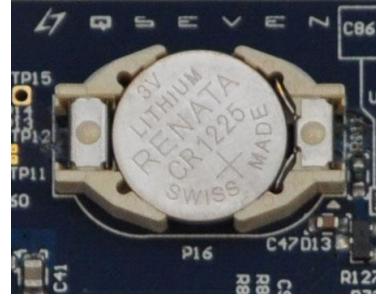

<b>Function</b>	<b>Fan PWM polarity</b> Selects either positive or negative								
<b>Location</b>	J3								
<b>Type</b>	1x2 2mm jumper								
<b>Pinout</b>	<table border="1"> <thead> <tr> <th>Position</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>off</td> <td>Positive</td> </tr> <tr> <td>on</td> <td>Negative</td> </tr> </tbody> </table>			Position	Description	off	Positive	on	Negative
Position	Description								
off	Positive								
on	Negative								
<b>Default</b>	floating								
									

## Battery

### Description

A CR1225 battery holder is provided at P16. This is a standard 3V battery, which powers the RTC (real time clock) on the CPU module. In most cases, it is not required to preserve critical BIOS settings as most Qseven modules have a flash based BIOS.

### Connector & LEDs

<b>Function</b>	Battery	
<b>Location</b>	P16	
<b>Type</b>	CR1225 battery holder	

## Hardware Installation

1. Ensure all external system power supplies are off.
2. Install the Qseven module into P1. Be sure to follow the manufacturer's direction for proper heatsink/heatspreader installation.
3. Verify all jumper settings from the relevant sections, paying special attention the power selection jumpers

Jumper	Function	Selection	Position
J1	PS/2 power	+5V	2-3
J2	Fan Power	+12V	1-2
J3	Fan PWM polarity	Positive	Off
J4	LVDS panel power	+3.3V	2-3
J5	LVDS backlight enable polarity	positive	Off
J6	LVDS Backlight Power	+12V	1-2
J7	Suspend Selection	S3	1-2
J8	Power Supply On	From Qseven module	2-3

4. Install the necessary cables for the application. At a minimum, this would include:
  - a) Power cable, either ATX or +5V/+12V only
  - b) Display cable, either VGA or LVDS
  - c) Keyboard, either PS/2 or USB
  - d) Power button, if applicable

For the relevant cables, see the Cables & Interconnect section of this manual

5. Stack any necessary PCIe-104 modules on top of the Xtreme/SBC via P2, with the appropriate mounting hardware

6. Connect the appropriate I/O peripherals to the interface cables: keyboard, mouse, Ethernet, monitor, etc.
7. Connect the power cable to power supply
8. Turn on the supply.

## Software Installation & Configuration

In general, always refer to the Qseven module's manual for proper installation of drivers and configuration software; as well as for appropriate BIOS settings.

The following sections provides some specific notes and hints for successful module integration

## Operating System Notes

### *Linux*

#### **General**

PS/2: Add kernel option i8042.nopnp to ensure keyboard and mouse PS/2 keyboard and mouse operation  
Power down: Add kernel option acpi=force to ensure proper software shutdown.

#### **US15W Specific**

Graphics: Intel Driver support for the Poulsbo / GMA500) is limited to several distributions (Redhat, Fedora). See IEGD (Intel Embedded Graphics Driver) website for details  
<http://edc.intel.com/Software/Downloads/IEGD/#compatibility>

Other distributions, such as Linux, are supported through the open source community.

### *Windows*

#### **General**

Ethernet:

Install the appropriate Ethernet driver from the Qseven module vendor's website.

#### **US15W Specific**

Graphics:

In some cases, the secondary LVDS display will appear washed out, to avoid this ensure the correct version of the IEGD is installed.

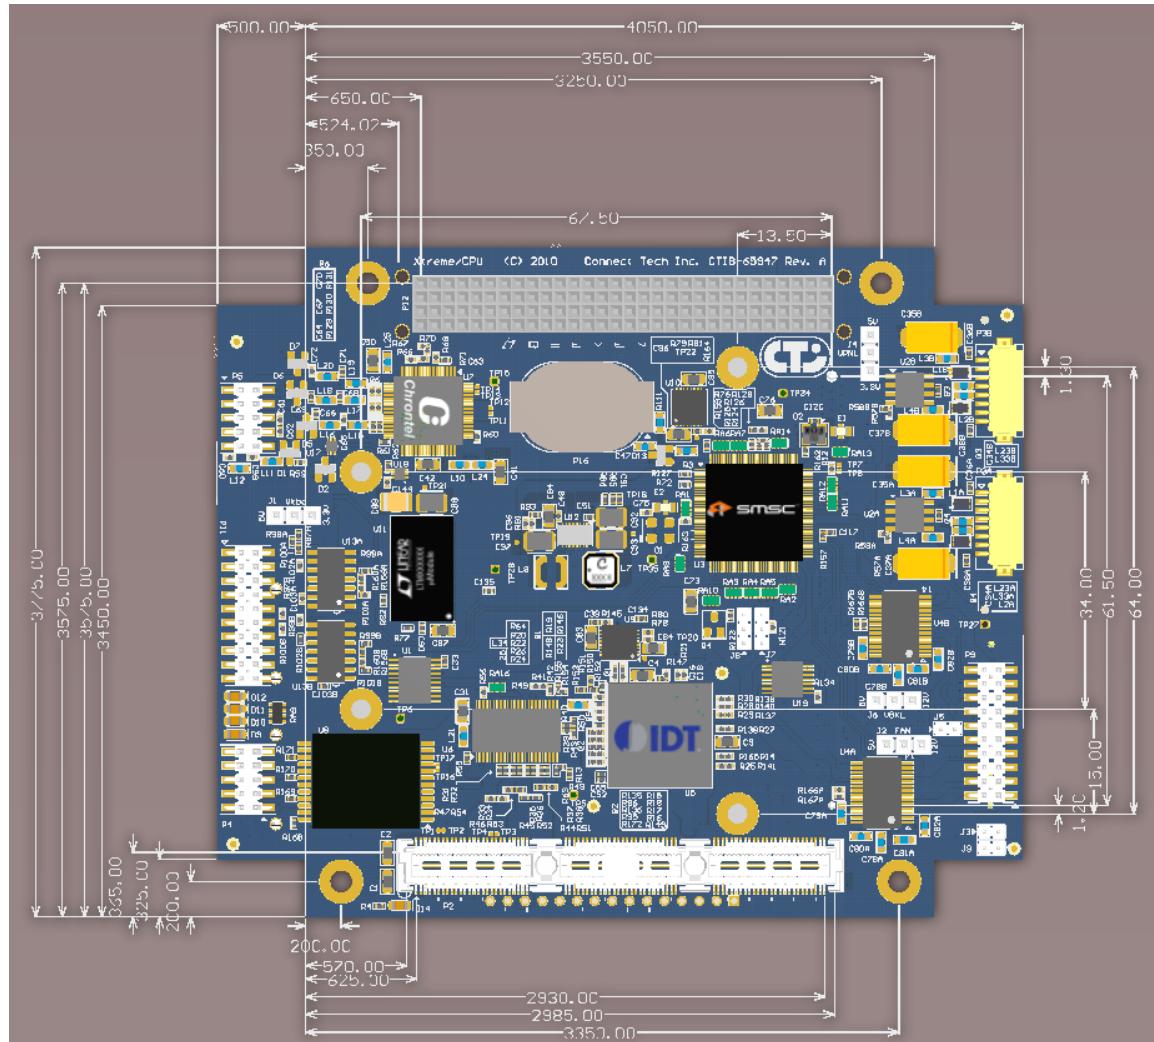

## Cables & Interconnect

The following table summarizes the Xtreme/SBC's headers and lists the matching cables included with the optional cable kit CKG001.

Location	PCB Connector	Cable Part Number	Drawing Number	Description	PCB End	Interface End
P3A, P3B	Hirose DF13-8P-1.25H(50)	CBG071	CTIC-00182	USB (dual)	Hirose DF13A-8S-1.25C	USB 2.0 Type A female
P4	MLE TSHSM-205-D-06-G-V-L	CBG065	CTIC-00181	GBE	2x5 2mm socket	RJ45 socket, GBE Ethernet

## Dimensions

## Specifications

<b>Form Factor</b>	PCIe/104, 4 x1 PCIe lanes
<b>Display</b>	VGA, LVDS flat panel
<b>Storage</b>	2x SATA (7 pin connector)
<b>Serial Interface</b>	2x RS-232, 2x RS-485
<b>USB</b>	4x USB 2.0
<b>Ethernet</b>	1x Gigabit Ethernet
<b>Dimensions</b>	PC/104 compliant
<b>Temperature</b>	-20°C to 70°C (-4°F to 158°F) <sup>[1]</sup>
<b>Power</b>	ATX supply input
<b>Power Consumption</b>	850 mA @ 5V Qseven carrier circuitry only. Does not include module power.
<b>Additional I/O</b>	PS/2 keyboard and mouse
<b>Warranty and Support</b>	Lifetime warranty and free technical support

[1] Temperature range is limited by the SDVO to VGA conversion circuitry.
